Experience

- Unified Mentor** 10/04/2025 - 10/07/2025
Fullstack Web Development Intern
 - Built and deployed 3+ full-stack web applications using React.js, Node.js, Express, and MongoDB.
 - Designed responsive, mobile-first UIs using React Hooks and Redux for state management.
 - Integrated REST APIs for real-time data handling, improving application responsiveness by 40%.
 - Collaborated in agile sprints, contributing to front-end, backend, and database architecture.
- Freelance and Open Source Experience** Jan 2022 -
Frontend Developer (Self-Taught & Hands-On Projects)
 - Developed Responsive Web Applications Using React.js, JavaScript, Redux, and Vue.js.
 - Built a Personal Portfolio Website to Showcase Projects, Improving UI/UX and API Handling Skills.
 - Cloned Popular Website's (e.g., Starbucks landing page) to Enhance Real-World Development Skills.

Projects

- Multi Theme App:**
a React-based web application with a theme switcher. The switcher should allow users to select from three distinct themes (Theme 1, Theme 2, Theme 3) using a dropdown in the header. Each theme should not only change colors, but also alter structure, fonts, spacing, and layout.
- Memory Card Game App:**
A Memory Card Game built with HTML, CSS, and JavaScript where players match pairs of cards by flipping them over. The game tracks moves and time, offering an engaging challenge to test memory and concentration. It features a responsive design and includes a timer and move counter.

- **Recipe Book:**

A Recipe Book app built with HTML, CSS, and JavaScript that allows users to store, view, and manage their favorite recipes. The app provides an organized way to add ingredients, instructions, and images, helping users easily keep track of and explore their cooking creations.

- **Tic-Tac-Toe game:**

A Tic Tac Toe game developed with HTML, CSS, and JavaScript where two players take turns to place 'X' or 'O' on a 3x3 grid. The objective is to align three marks in a row, column, or diagonal to win. The game includes functionality to reset and play multiple rounds.

- **Recipe Book App:**

A Recipe Book app built with HTML, CSS, and JavaScript that allows users to store, view, and manage their favorite recipes. The app provides an organized way to add ingredients, instructions, and images, helping users easily keep track of and explore their cooking creations.

- **To Do List App:**

A simple, responsive web-based To-Do List application built using HTML, CSS, and JavaScript. This app allows users to add, edit, delete, and manage their tasks, with local storage support to persist data between sessions.
